

AZMAEEN MAHTAB EZAZ

Junior Full Stack Web Developer

+880 1331374944 | mahtabazmaeen7@gmail.com | HatirJheel, Rampura, Dhaka

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER OBJECTIVE

Passionate Full Stack Web Developer with hands-on experience building modern web applications using Next.js, Node.js, and TypeScript with expertise of manipulating sql and no-sql databases. Seeking to grow as a software engineer by contributing to impactful products, automate systems while continuously expanding my technical expertise.

SKILLS

Languages: C, C++, JavaScript, TypeScript, Java, Dart

Frontend: React.js, Next.js, TailwindCSS, Flutter

Backend: Node.js, Express.js, Spring Boot, TypeScript

Database & Tools: PostgreSQL, MongoDB, MySQL, Supabase, Git, Figma, Vercel, Prisma, JWT, N8N

Interpersonal: Problem Solving, Team Collaboration, Time Management, Communication

PROFESSIONAL EXPERIENCE

Full Stack Developer (Freelance) — Upwork 2025 – Present

- Build full stack web applications using Next.js, TailwindCSS, Node.js/Express and TypeScript for international clients.

AI Trainer — Outlier.ai 2026 – Present

- Created rubrics and evaluated AI response.
- Ranked and provided expert feedback on model responses to improve code generation and general output accuracy.

PROJECTS

PawPals| Personal Project | NextJS, Node.js, Express, Mongodb

[Server](#) | [Client](#) | [LiveLink](#)

A full-stack project for making Pet Adoption smoother and enjoyable with appealing UI.

- Developed JWT authenticated role based features for owner and adopter.
- Individual dashboard for history tracking for adopted/pending/rejected pets for adopter and owner.
- Filter Pets, Add own pet and place adoption request with secure authentication via OAuth.

Mess Expert | Team Project | React, Node.js, Express, PostgreSQL, NeonDB

[Server](#) | [Client](#) | [LiveLink](#)

A full-stack mess management app with authentication and role based authorized features to manage mess effectively.

- Developed JWT-based authentication with role-based access control for members and managers.
- Build personal money management dashboard for individual user.
- Automated monthly billing with expense tracking and meal management dashboard.

AI-Driven Security Platform | Team Project | Fine Tuned Vision Model, Node.js, Typescript | Ongoing [LiveLink](#)

Bangladesh's first AI security platform targeting mobile theft syndicates, integrating custom LLM fine-tuning with real-time fraud detection.

- Developed custom LLM fine-tuned model to detect patterns in stolen and fraudulent mobile device reports.
- Security platform with real-time alerting, fraud and reselling detection of your stolen phone.

EDUCATION

Ahsanullah University of Science and Technology (AUST)

2024 – Present

B.Sc. in Computer Science & Engineering

Relevant Coursework: OOP, Software Development (Flutter, React), Discrete Mathematics, Operating Systems

EXTRA-CURRICULAR ACTIVITIES

- **SOLVIO AI Hackathon Phase-2 Participant (2025):** Co-developed the first AI-driven mobile security system concept in Bangladesh, combining LLM fine-tuning with a full stack platform for real-time fraud detection and reselling tracking.
- Participant in **IAPC (Intra AUST Programming Contest)** and secured **Runners-up** position in Junior Category.

CERTIFICATIONS

- Career Development Boot-camp on Web Development - ACS
- AI Driven Full Stack Web Development - Programming Hero
